TEST SUMMARY REPORT

Project Name: Mercury Tours
Tested By: Amnu kalam
Test Start Date: 7/04/2026
Test End Date: 21/04/2026
Environment: Web (Chrome, Firefox), Desktop & Mobile Responsive

➢ Introduction

This Test Summary Report provides an overview of the testing activities performed on Guru99 applications including Insurance, New Tours, and Payment Gateway. The purpose is to summarize test execution results, defects, and overall quality status.

➢ Test Objectives

- Validate all core functionalities of the Mercury tour websites.
- Ensure user interface responsiveness and cross-browser compatibility.
- Verify data accuracy for all projects
- Identify and log defects, ensuring critical issues are resolved before release.

➢ Scope of Testing

In Scope:

- Selenium Page
- New Tour Page
- Agile Page
- Security Page
- Bank Page
- Payment Gateway Page
- Insurance Page
- Telecom Page

Out of Scope:

- Payment Gateway Integration (Handled by third-party provider)
- Performance & Load Testing (Planned for a future phase)

➢ Types of Testing Performed

- Functional Testing
- UI/UX Testing
- Smoke Testing
- Regression Testing

➢ Test Environment

Component Description

Browser → Chrome, Firefox
OS → Windows 11, Android 13
Test Data → Realistic sample data
Tools Used → Selenium WebDriver
Framework→TestNG
IDE→Eclipse

➢ Key Achievements

- Reduced manual testing effort
- Improved execution speed
- Reusable automation scripts developed

➢ Challenges Faced

-Synchronization issues
-Dynamic element handling
-Navigation delays

➢ Defect Summary

Severity	No: of Defects	Status
Critical	15	New
Major	3	New
Total	18	18 new

➢ Risk and issues

Several functional and synchronization issues were detected in the New Tours application, which could impact system reliability and user interaction. It is recommended to resolve these problems before moving to production.

➢ Test Result Summary

The application has undergone comprehensive testing. Automation testing was successfully implemented, but most of the critical functionalities are not working as expected. As a result, the website is not ready for production release.

→ Fix all critical and major defects identified during testing

→ Improve input filed validation to enhance data integrity

➢ Sign-Off

The testing activities for the Mercury Tours Project have been completed based on the defined scope and test plan.

All identified defects have been documented and shared with the development team. However, due to the presence of critical and major defects, the application is not approved for production release at this stage.

Final sign-off will be provided after successful resolution and re-testing of all high-priority issues.
